Features and benefits

Primary screening for SARS-CoV-2, Flu A/B and RSV

Detection and differentiation of SARS-CoV-2, influenza A, influenza B and RSV at once

Expandable multiplex PCR syndromic testing

SARS-CoV-2 test alone or combination test with high multiplex respiratory essential panel for other common respiratory viruses

Complementation of genetic variations

Detection of 3 or more target genes to complement genetic variations of SARS-CoV-2

Seegene's
